Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the general public, environment, and personnel involved in the storage and disposal effort.

- ◆ Disposal is safer than continued storage.
- ◆ Incineration is truly a safe, efficient disposal process.
- ◆ More than 10,000 tons have been safely incinerated by the U.S.
- ◆ Pollution control systems protect people, environment.
